The squares!

You can make these squares in any colour you wish, personally im looking forward to seeing all kinds of variations you might make on these squares.

If you bought a kit at our store please keep in mind the amount of yarn in the kit is based on the blankets in the order we made them.

But for instance, you could still play a little by using a different colour for the first 2 rows. You should have plenty yarn left to do so.

1 last important note: When you are working with catona or stylecraft from 1 of our kits please use colour D instead of C where the pattern says colour C

SQUARE A

4 x in Moonstone **colour A**

Repeat the first 10 rounds of the start of the element pattern. The colourchanges will be different of course, so just sl.st to the ch2 space in the beginning of rounds when needed.

You will now have 7 GS on the sides and 1 GH in de corners

Round 11. Start in a corner and work in the ch2 space, make * 1 sc, ch1, 1 sc

1 sc in the first st

<1 sc in the next 2 st

1 fptrc around the fptrc of the GS in round 9

Sk 1 st >

Repeat between < and > 7 more times

1 sc in the next 2 st *

Repeat between * and * 3 more times and close this round using the invisible join method

Each square has a final stitch count of 29 stitches per side and ch1 in the corners
